PROFILE

Senior Mobile Software Engineer with **10+ years** of experience designing, building, and shipping high-performance mobile applications across **native** and **cross-platform** ecosystems. Deep expertise in **Flutter/Dart**, **Android (Kotlin/Java)**, and **iOS (Swift)**, with a strong focus on clean architecture, performance optimization, and end-to-end product ownership. Proven ability to lead mobile teams and deliver scalable solutions across diverse industries including transportation, insurance, GIS, and e-commerce.

CORE COMPETENCIES

Flutter / Dart	RESTful APIs & WebSockets	CI/CD & DevOps
Android / Kotlin & Java	Deep Linking & Attribution	Version Control (Git)
iOS / Swift	Push Notifications (FCM/APNs)	Test-Driven Development
Multi-Platform SDK Architecture	State Management (GetX, Bloc)	Agile & Scrum
Clean Architecture & MVVM	GIS & Mapping Solutions	SQL / NoSQL Databases

PROFESSIONAL EXPERIENCE

Senior Mobile Engineer | SDK Architect

2025 – Present

WiseTrack | Tehran, Iran

Flagship Project: WiseTrack Multi-Platform SDK

- Architected a production-grade multi-platform analytics and attribution **SDK** adopted across mobile, web, and Unity ecosystems.
- Developed native SDKs for Android (Kotlin) and iOS (Swift), a web SDK with TypeScript (published on npm), a Flutter plugin with platform channels, and a Unity package with C# wrapper.
- Published SDKs on Maven, CocoaPods, npm, pub.dev, and Unity Package Manager (UPM) for seamless developer adoption.
- Implemented deep linking, deferred attribution, session lifecycle tracking, and fingerprint-based matching at scale
- Published SDKs on Maven, CocoaPods, npm, pub.dev, and Unity Package Manager (UPM) for seamless developer adoption.

Tech Stack: Kotlin, Swift, TypeScript, Dart, Unity, Platform Channels, Deep Linking, Device Fingerprinting, CDN Distribution

Senior Flutter Developer

2025 – 2026

KiyaCo Group | USA (Remote)

- Built real-time social messaging platform supporting group collaboration and private communication using SignalR WebSockets, published on both Google Play and App Store.
- Designed scalable chat architecture using persistent WebSocket connections
- Delivered cross-platform mobile experience and responsive PWA for public profiles.
- Improved user engagement through fast onboarding and interactive UI flows

Tech Stack: Flutter, Dart, React, SignalR, WebSockets, GetX, Clean Architecture

Mobile Lead & Senior Flutter Developer

2024 – 2025

Samdad Company | Iran

- Led development of a nationwide school transportation management platform consisting of 3 interconnected applications (Service Company, Family, Driver) for Android, iOS, and PWA.
- Implemented real-time vehicle tracking with GPS integration, online payment processing, and multi-language/multi-theme support.
- Managed app distribution across Iranian app stores (CafeBazaar, Myket) with platform-specific optimizations.
- Led development of a nationwide multi-role transportation management system serving drivers, families, and service operators
- Implemented real-time vehicle tracking and route monitoring at scale
- Integrated secure payment flows and multilingual user experience
- Architected shared codebase across mobile and web platforms
- Tech Stack: Flutter, Realtime GPS, Payments, PWA

Technologies: *Flutter, Flutter Map, GoRouter, GPS Tracking, PWA, Online Payment, Shamsi Date*

Senior Flutter Developer

2024

Saafaa Co. – Mashhad & Karaj Municipality | Iran

- Developed a government audit application with complex offline/online map layer management (WMS, WFS, MBTiles) and custom Spatialite database integration built from scratch in Flutter.
- Created a dynamic form builder for field data collection and implemented offline-first architecture with SQL-based local storage.

Technologies: *Flutter, Spatialite, Sqflite, Flutter Map, WMS/WFS Layers, Offline Maps, GeoData*

Senior Flutter Developer

2024

Dayan Co. (Koomek Platform) | Iran

- Built a smart automotive service platform connecting customers with mechanics, featuring real-time service tracking, in-app payments, and provider management tools for Android and Web.

Technologies: *Flutter, GetX, Dio, Flutter Map, FCM, Multi-Language/Theme*

Technical Lead & Flutter Developer

2023 – 2024

Turkey Rahyab Company | Turkey

- Led development of "Etlo" super application featuring insurance services, business profiles, cryptocurrency wallet, and real estate transactions with multi-theme and multi-language support.
- Built "Platinum" insurance application enabling users to compare and purchase policies from multiple providers with installment management and reporting features.

Technologies: *Flutter, Bloc, GoRouter, Firebase, Swagger, TestFlight, Google Play Console*

Flutter Developer

2023

Shiraz Municipality | Iran

- Developed a fleet management system (FMS) for public transportation with real-time vehicle tracking on maps, advanced search, and reporting capabilities.
- Built an Android driver tracking application (Kotlin) with persistent background location reporting across all Android versions.

Technologies: *Flutter, Kotlin, GetX, MVVM, Flutter Map, WMS Layers, Offline Maps*

Flutter Developer

2023

Hamechizdan.ir | Iran

- Developed multimedia learning platform for children with offline content access, parental controls, and multilingual interactive experience.
- Designed and built a dedicated Android TV application with Flutter, adapting the full feature set for large-screen navigation and remote-control interaction — including custom UI/UX design optimized for the TV experience.

- Integrated subscription-based monetization with online payment system.

Technologies: *Flutter, Video/Audio Players, Download Manager, Offline Media, Payments, Android TV,, UI/UX Design*

Flutter Developer

2022 – 2023

Beauticket Company | Turkey

- Built 3 interconnected applications (Business, Bookings, Admin Panel) for a beauty services marketplace supporting location-based search, real-time chat, credit card payments, and multi-language/theme.
- Published on both App Store and Google Play with a full CI/CD pipeline.

Technologies: *Flutter, Google Maps, WebSocket, Apple/Google Auth, Charts, PostgreSQL*

Lead Mobile Application Developer

2019 – 2022

APEX Company | Iran

- Led mobile development across iOS (Swift), Android (Java), and Flutter (Web) for a logistics platform enabling drivers to search, book, and track factory loads.
- Built iOS app with RxSwift, CoreLocation, and MVVM architecture; maintained and optimized Android app with RxJava and Retrofit.
- Developed a Flutter-based web support panel for load supervision and driver assignment with WebSocket real-time updates.

Technologies: *Swift, RxSwift, Java, RxJava, Flutter, MVVM, WebSocket, MongoDB, CI/CD*

iOS Developer

2018 – 2019

Airwork Company | Canada (Remote)

- Developed an iOS service request platform using Swift and RxSwift with SQLite, Core Animation, Core Data, and Google APIs integration.

Technologies: *Swift, RxSwift, SQLite, Core Animation, Core Data, MVVM, TestFlight*

Android Developer

2016 – 2018

Saafaa Company | Iran

- Built a billboard management application for Yazd Municipality with map-based visualization, photo/video reporting, and field documentation tools.
- Developed a Mobile GIS application with support for multiple online/offline map layers (WMS, WFS, XYZ, WMTS, TMS), route navigation, map drawing tools, and clustering capabilities.

Technologies: *Java, MapBox, RxJava, GeoServer, PostgreSQL, WMS/WFS, MVP*

Android Developer

2015 – 2016

Freelance | Iran

- Developed multiple Android applications including a business directory (Karyabin), e-commerce shopping platform (BordBord), and chain store warehouse management system.

Technologies: *Java, MySQL, MSSQL, REST API, Retrofit*

EDUCATION

M.Sc. Software Engineering

Yazd University
2022 – 2026

B.Sc. Computer Sciences

Yazd University
2016 – 2020

Diploma, Math & Physics

SAMPAD (Exceptional Talents)
2012 – 2016
